

Ajaykumar N Kulkarni

AI Engineering Manager | GenAI & MLOps Leader | Full Stack AI Architect

Bengaluru, Karnataka | +91 96862 43396 | ajaykulkarni178@gmail.com | [LinkedIn](#) | [Portfolio](#)

AI Engineering Manager with 12 years of experience architecting and delivering enterprise-grade Generative AI, MLOps, and full-stack AI solutions. Proven track record leading cross-functional teams on end-to-end AI-integrated applications using LangChain, LangGraph, Azure OpenAI, and cloud-native platforms. Delivered award-winning AI solutions at NatWest and driving enterprise AI innovation at Accenture. Certified Google Cloud ML Engineer with deep expertise in agentic AI systems, LLM orchestration, event-driven architectures, and scalable ML pipelines.

SKILLS

AI & GenAI: LangChain, LangGraph, Agentic AI, LLM Orchestration, Generative AI Pipelines, Azure OpenAI, GPT-4o, RAG Pipelines, Prompt Engineering, NLP, Deep Learning, Transformer Models

MLOps & Cloud: MLOps (End-to-End Lifecycle), MLflow, Azure ML, GCP Vertex AI, Kubernetes (K8s), CI/CD Automation, Docker, GCP/AWS/Azure Multi-Cloud, Event-Driven Systems, Apache Kafka, Azure Service Bus

Full Stack & Engineering: React.js, Angular, Python, FastAPI, Node.js, Kotlin, REST APIs, Microservices Architecture, Distributed Systems

Leadership & Delivery: AI Architecture, Team Mentoring, Cross-functional Stakeholder Management, Agile Program Delivery, Client-Facing Engagement, Workshop Facilitation

Data & Governance: Privacy Compliance (GDPR/Financial Regs), Scalable Data Pipelines (ETL), Data Modeling, Container Orchestration

EXPERIENCE

Accenture, Bangalore | Associate Manager — AI Engineering - August 2024 – Present

- Architected AI-powered, cloud-native platforms for insurance/reinsurance on Azure using LangChain and Azure OpenAI, improving claims processing efficiency by 35% with 99.9% uptime.
- Built Bordereaux Standardization Platform using GPT-4o and agentic AI workflows, reducing manual effort by 40%+ through intelligent document processing pipelines.
- Designed scalable MLOps data pipelines and an AI-driven claims system automating 60% of workflows — leveraging LangGraph for multi-agent orchestration and Azure ML for model lifecycle management.
- Led Market Matrix, a greenfield full-stack AI platform for brokers, integrating Azure OpenAI GPT with React.js frontend and FastAPI backend, following event-driven architecture patterns.
- Managed a cross-functional team of 7 AI engineers, collaborating closely with PMs and US stakeholders — driving delivery excellence and mentoring junior engineers on GenAI best practices.
- Currently leading the architecture and modernization of an AI-powered Website Monitoring System (WMS) for large-scale regulatory intelligence, leveraging Azure-native services, advanced change detection, and LLM-driven compliance analysis.

NatWest Group, Bengaluru | Senior Software Engineer - September 2021 – August 2024

- Led development of Carbon Planner — an AI-powered sustainability analytics platform on AWS — achieving 40% reduction in data processing latency and GDPR-compliant data handling.
- Optimised AWS infrastructure through microservices, containerisation (Docker/K8s), and robust CI/CD pipelines, resulting in 20% cut in operational costs.
- Mentored a team of 5 junior developers, accelerating overall delivery velocity by 25% through structured code reviews and knowledge sharing.
- Received Best Environmental Project Award — recognising Carbon Planner's impact as a vital green-banking AI solution at NatWest Group.

DellEMC, Bengaluru | Software Engineer - October 2017 – September 2021

- Designed, developed, and deployed robust full-stack web and mobile applications for enterprise clients including Dell, DellEMC, and their partner/vendor ecosystem.
- Led complete code and system design — contributing to architecture, testing, and deployment of complex client/server and multi-tier distributed systems.
- Achieved Certified Scrum Master (CSM) and Certified Scrum Developer (CSD) certifications — driving Agile delivery excellence across teams.

enEXL Technologies, Bengaluru | Software Engineer - June 2015 – February 2017

- Spearheaded development of internal product BluPay and delivered custom web applications for diverse external clients.
- Led end-to-end project management for Vetax — overseeing client collaboration, functional specs, UAT, and deployment.

Cheers Labs, Bengaluru | *AVP, Product & Technology* - August 2014 – March 2015

- Led development of Zen Project — a Brain-Computer Interface (BCI) system integrating 16+ electrode headset with custom neural signal processing interface.
- Demonstrated full-stack proficiency by engineering Tizen mobile applications for the BCI system.

Df3d creations Pvt Ltd, Bengaluru | *Software Engineer* - May 2014 – July 2014

- Spearheaded the development of an e-commerce platform for df3d, enabling them to showcase and sell their 3D printing products and services online.

VA TechVentures Pvt Ltd, Bengaluru | *Intern* - September 2013 – October 2013

- Collaborated with the business development team to expand market reach and increase brand awareness by conducting educational seminars at colleges on fintech solutions and retail marketing.
- Contributed to strategic market development initiatives aimed at accelerating user base growth and strengthening Happay's competitive position in the fintech landscape.

EDUCATION

- **BITS, Pilani, Rajasthan** — M.Tech (Software Systems) | June 2019 – July 2021
- **JSS Science and Technology University, formerly known as Sri Jayachamarajendra College of Engineering, Mysore** — BE (Computer Science) | September 2009 – July 2013

CERTIFICATIONS

- Google Cloud Professional Machine Learning Engineer
- Google Cloud Associate Cloud Engineer
- Certified Scrum Master (CSM)
- Certified Scrum Developer (CSD)
- Accenture Certified Data/AI Architect

RECOGNITION & VOLUNTEERING

- **Featured In:** OfficeChai — "These 7 Amazing People Fought Their Disabilities and Rose to the Top"
- **Volunteering:** Mentor, Learn IT, Girl (3rd edition)
- **Personal:** Hearing disability since birth; effectively communicates using hearing aids and lip-reading
